Pages: 176

A thrilling adventure about a young girl, who's world is turned upside down.

Olivia, a 14-year-old from Aarhus, thinks she's just an ordinary eighth-grader. That is until a strange old man insists she's actually a warrior named Aiyana—and that she's in danger. At first, Olivia brushes him off, but as strange things start happening, she realizes she might not be who she thought.

As Olivia uncovers the truth about her identity, she's thrust into a dangerous world filled with hidden enemies. To survive, she must tap into a strength she never knew she had. What was once a normal life of school and friends becomes a high-stakes adventure where Olivia must prove who she really is.

This is the first book in this series, published in Denmark early 2024.

This book about Olivia and her friends is the first part of the Sky People series. The story ranks high on the excitement scale, and I must say, I was thoroughly entertained.
